ANUBHAV BAGHEL

Frontend Developer | New Delhi, India | Portfolio | +919873181404 | Mail | GitHub | LinkedIn | Threads

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building web apps using React, NextJS and android apps using React Native. Currently contributing to web development projects at DI Infotech.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL
Frontend & Frameworks: React, React Native, Tailwind CSS, NextJS, WordPress.
Dev Tools: Git, GitHub, Vercel, Vite, Chrome DevTools, VSCode, Zustand
Other: API Handling, Responsive Web Design, Global State Management
Soft Skills: Analytical Problem Solving, Cross-functional Collaboration, Agile Adaptability, and User-Centric Design Thinking.

PROJECTS

GitHub User Explorer | Github | Link
React | Vite | Tailwind CSS | Zustand | Octokit

- Developed a web application to search and visualize GitHub profiles and repository data in real-time.
- Architected a modular UI using Atomic Design principles (Atoms, Molecules, Organisms) to ensure codebase scalability and reusability.
- Engineered global state management using Zustand, implementing middleware for state persistence and seamless data synchronization across sections.
- Integrated the GitHub REST API via Octokit to dynamically fetch and render user bios, follower metrics, and detailed repository metadata (stars, languages, timestamps).

Hydra: Hydration Reminder App | Github | Link
React Native | Expo | NativeWind | AsyncStorage

- Developed a cross-platform mobile application designed to promote healthy habits by tracking water intake and providing intelligent hydration reminders using React Native.
- Implemented a local data persistence layer using AsyncStorage to track and store daily consumption history without the need for an external database.
- Developed a custom notification system using Expo Notifications to trigger recurring hydration alerts based on user-defined intervals.
- Designed a minimal, distraction-free UI utilizing NativeWind (Tailwind CSS), focusing on reducing friction for quick water logging (e.g., predefined 250ml/500ml increments).
- Integrated visual progress indicators to provide real-time feedback on daily hydration goals, helping users visualize consumption trends.

ERA : Shopify Store |Link | Pass-[theild]
Curated a refined e-commerce experience for a luxury women's fashion label, featuring seamless navigation, automated product collections, editorial-driven UI, and a secure Shopify checkout optimized for high-conversion styling.
Tech: Shopify, E-commerce, CSV Inventory Management, Responsive Design

WORK EXPERIENCE

Web Development Intern
DI Infotech Leaders Pvt. Ltd.| (Jan 2026 – Present)

- Developed and maintained websites using React and modern frontend technologies, reducing load times through asset optimization and clean layout architecture..
- Translated designer wireframes into functional, responsive web components using React and Tailwind CSS, maintaining strict adherence to UI/UX principles and brand guidelines.
- Streamlined site communication workflows by integrating robust SMTP services and advanced form logic.
- Collaborated with SEO specialists to implement technical on-page improvements, directly contributing to increased organic traffic.
- Resolved critical technical issues and performed routine security audits to maintain high site integrity and data protection.

EDUCATION

Bachelor's of Science | Dayalbagh University | 2024
